Portfolio - <https://subodhbhyri.vercel.app>

EDUCATION

University of Florida

Master of Science, Computer Science, GPA - 3.6/4

Aug 2024 - May 2026

Gainesville, Florida

University of Mumbai

Bachelor of Engineering, Computer Science, GPA - 8.54/10

Aug 2019 - Jul 2023

Mumbai, India

WORK EXPERIENCE

Vishwanath Projects Limited

Aug 2023 - Apr 2024

Associate Software Engineer

Hyderabad, India

- Architected and delivered a centralized admin screen for real-time monitoring of transmission line health, aggregating sensor data to improve operational visibility and reduce incident response time
- Designed and implemented a scalable RBAC system using React and Node.js, enabling secure user management for 500+ users across multi-tier enterprise environments
- Optimized data transfers between platform components via REST API integration using Node.js, achieving a 60% increase in data retrieval speed and lowering latency by 20ms
- Secured user authentication by integrating OAuth2 and JWT, resulting in a 99.9% success rate for secure token-based access and an improved user authentication workflow

OPEN-SOURCE CONTRIBUTIONS

- [chartjs/Chart.js](#) — Fixed missing [number, number] tuple type support for line/scatter datasets
- [visgl/deck.gl](#) — Added TypeScript types for loaders.gl point cloud data format (MeshAttributes)
- [visgl/react-map-gl](#) — Removed stale @ts-ignore directives for localIdeographFontFamily across all map modules

PROJECTS

LLM Eval: Multi-Model AI Evaluation Platform | Python, FastAPI, React/TypeScript, PostgreSQL, Redis, Kafka, RAGAS, Docker, Prometheus | <https://ragas-bench.vercel.app>

- Built a real-time LLM evaluation platform benchmarking Claude, GPT-4o, and Gemini concurrently using async Python, scoring faithfulness, context precision, context recall, and answer relevancy via RAGAS
- Shipped a React/TypeScript dashboard with metric cards, radar chart, composite bar chart, and 5-second real-time polling with status badge updates, deployed on Vercel with FastAPI on Render
- Instrumented backend with Prometheus metrics at /metrics and integrated Kafka producer for real-time streaming of evaluation events at scale

Timeline: Explore History Through Time and Space | React Globe GL, MapLibre GL JS, Gemini API, MongoDB Atlas Vector Search (RAG), MCP (Model Context Protocol) Server | <https://timeline-tau-eight.vercel.app>

- Architected an AI-native agentic platform using Gemini, MCP, and MongoDB Atlas Vector Search, enabling external AI agents to perform standardized tool-calling, retrieve verified data, and execute intelligent actions across domains
- Designed and deployed a multi-agent pipeline integrating LLM reasoning with a semantic RAG backend, applying prompt engineering and telemetry to reduce hallucinations by 40% and improve end-to-end agent observability

Comrades: Vicinity-Based Social Networking Platform | Node.js, Express.js, Mongoose, JWT, Socket.io, Google Maps API Geospatial Queries, LangChain, Gemini | <https://comrades.vercel.app>

- Designed and shipped an end-to-end AI agent using LangChain and Gemini to classify post intent, query geospatial user data, and dispatch targeted real-time notifications achieving 95%+ classification accuracy with sub-second latency
- Built an AI agent using LangChain and Gemini to classify post intent, query nearby users, and dispatch targeted real-time notifications via Socket.io, achieving 95%+ classification accuracy with sub-second latency

Slotify: AI-Powered Distributed Ticket Reservation System | Java 21, Spring Boot, Apache Kafka, Redis, PostgreSQL, WebSockets, gRPC, Kubernetes, Prometheus, Grafana, GitHub Actions | <https://github.com/subodhbhyri/slotify>

- Engineered an event-driven ticket reservation platform using microservices and Apache Kafka, handling concurrent booking requests with priority-based waitlist allocation via Redis sorted sets and automatic seat reassignment
- Validated sub-35ms p99 booking latency under 100 concurrent users via k6 load testing, processing 65+ reservations/second with 100% success rate across 19,745 requests

SKILLS

Languages & Frameworks: Python, TypeScript, JavaScript, Java, FastAPI, Node.js, React, Spring Boot, gRPC

AI & Agentic Engineering: RAGAS, LangChain, CrewAI, A2A, MCP, RAG pipelines, Vector Databases, LLM APIs (Claude, GPT-4o, Gemini), Prompt Engineering, Multi-Agent Systems, Multi-model Benchmarking

Observability: Kafka, Airflow, Prometheus, Grafana, OpenTelemetry, SSE-based streaming, end-to-end agent monitoring

Databases & Cloud: AWS, Supabase, Docker, Kubernetes, PostgreSQL, MySQL, MongoDB, Redis, Apache Cassandra

Backend & Architecture: Distributed Systems, Microservices, Event-Driven Architecture, REST APIs, OAuth2/JWT
