Portfolio - <https://subodhbhyri.vercel.app>

EDUCATION

University of Florida

Master of Science, Computer Science, GPA - 3.6/4

Aug 2024 - May 2026

Gainesville, Florida

University of Mumbai

Bachelor of Engineering, Computer Science, GPA - 8.54/10

Aug 2019 - Jul 2023

Mumbai, India

WORK EXPERIENCE

Vishwanath Projects Limited

Aug 2023 - Apr 2024

Associate Software Engineer

Hyderabad, India

- Architected and delivered a centralized admin screen for real-time monitoring of transmission line health, aggregating sensor data to improve operational visibility and reduce incident response time
- Designed and implemented a scalable RBAC system using React and Node.js, enabling secure user management for 500+ users across multi-tier enterprise environments
- Optimized data transfers between platform components via REST API integration using Node.js, achieving a 60% increase in data retrieval speed and lowering latency by 20ms
- Secured user authentication by integrating OAuth2 and JWT, resulting in a 99.9% success rate for secure token-based access and an improved user authentication workflow

OPEN-SOURCE CONTRIBUTIONS

- [chartjs/Chart.js](#) — Fixed missing [number, number] tuple type support for line/scatter datasets
- [visgl/deck.gl](#) — Added TypeScript types for loaders.gl point cloud data format (MeshAttributes)
- [visgl/react-map-gl](#) — Removed stale @ts-ignore directives for localIdeographFontFamily across all map modules

PROJECTS

LLM Eval: Multi-Model AI Evaluation Platform | Python, FastAPI, React/TypeScript, PostgreSQL, Redis, Kafka, RAGAS, Docker, Prometheus | <https://ragas-bench.vercel.app>

- Built a consumer-facing React dashboard with metric cards, radar chart, composite bar chart, and 5-second real-time polling, applying component-based design patterns and responsive UI principles for a seamless user experience
- Designed and shipped a full-stack evaluation platform with a React/TypeScript frontend and FastAPI backend, establishing reusable component patterns, strong TypeScript typing, and clean state management across the codebase
- Instrumented backend with Prometheus metrics at /metrics and integrated Kafka producer for real-time streaming of evaluation events at scale

Timeline: Explore History Through Time and Space | React Globe GL, MapLibre GL JS, Gemini API, MongoDB Atlas Vector Search (RAG), MCP (Model Context Protocol) Server | <https://timeline-tau-eight.vercel.app>

- Architected a TypeScript-based AI-native web platform integrating React Globe GL, MapLibre GL JS, and MCP, building interactive 3D globe and map visualizations with real-time AI response streaming via Server-Sent Events
- Built a semantic RAG pipeline with tiered fallback logic, reducing LLM hallucinations by 40% — surfacing results through a polished React UI with real-time streaming reducing Time to First Token by 25ms

Comrades: Vicinity-Based Social Networking Platform | Node.js, Express.js, Mongoose, JWT, Socket.io, Google Maps API Geospatial Queries, LangChain, Gemini | <https://comrades.vercel.app>

- Designed and shipped a consumer-facing React/TypeScript platform with a Node.js/Express backend, supporting real-time interactions and geospatial content discovery across 1,000+ simulated concurrent user sessions via Socket.io
- Built an AI agent using LangChain and Gemini to classify post intent, query nearby users, and dispatch targeted real-time notifications via Socket.io, achieving 95%+ classification accuracy with sub-second latency

Slotify: AI-Powered Distributed Ticket Reservation System | Java 21, Spring Boot, Apache Kafka, Redis, PostgreSQL, WebSockets, gRPC, Kubernetes, Prometheus, Grafana, GitHub Actions | <https://github.com/subodhbhyri/slotify>

- Built frontend monitoring dashboards and data visualization components integrating with Spring Boot backend APIs, displaying real-time booking metrics and system health across distributed microservices
- Validated sub-35ms p99 booking latency under 100 concurrent users via k6 load testing, processing 65+ reservations/second with 100% success rate across 19,745 requests

SKILLS

Languages & Frameworks: TypeScript, JavaScript, React, Redux, React Native, Express, Angular, Python, Java, gRPC

Frontend & UI: Component-Based Design, Responsive UI, HTML5/CSS3, Server-Sent Events (SSE), WebSockets, Socket.io, Real-time Data Visualization, Web Performance, Accessibility

Web Platform & Tooling: MCP, REST APIs, OAuth2/JWT, GitHub Actions, Bundlers, Monorepo Development, TDD

Testing & Quality: Jest, JUnit, TDD, Unit/Integration Testing, Load Testing (k6), Code Review, Agile/Scrum

Databases & Cloud: AWS, Supabase, Docker, Kubernetes, PostgreSQL, MongoDB, Redis, Prometheus, Grafana
